American Heart Association CPR Cheat Sheet

CPR with an Advanced Airway An advanced airway is the use of a laryngeal mask, supraglottic or endotracheal tube. When you use an advanced airway, you do not stop compressions to give breaths like you do during 2 person CPR. Give one breath every 6-8 seconds and there should be no pause in chest compressions for delivery of breaths.

BLS Study Guide for American Heart Association Classes

The American Heart Association announced its newest CPR recommendations on October 16 th, 2015. The new CPR guidelines are based on the latest scientific data from the previous 5 years. The new update has placed limits on how fast and deep chest compressions should be performed. The guidelines are updated every five years.
