An ecologically Healthy City. Simply put, an ecocity is an ecologically healthy city. And because each city is unique, there is no one-size-fits-all ecocity model or just one way to get there from where we are now. However, ecocities share basic characteristics analogous to healthy ecosystems and living organisms.

## **What is an Ecocity? - Ecocity Builders**

The transition to sustainable cities depends on social, cultural, economic and climatic factors. In the fast-growing cities of developing economies, basic needs such as energy, water and mobility should be met sustainably. At the same time, resources should be managed effectively.
