Electro-Motive Diesel - Wikipedia

Switchers (SW/NW/SC/NC/MP) The "S" designation originally stood for six hundred horsepower and the "N" designation for nine hundred horsepower, although they were used for the more general designation of smaller and larger engine models after the more powerful 567 model engines replaced the Winton engines. The "C" designation stood for cast frame locomotives and the "W" designation for welded ...

List of GM-EMD locomotives - Wikipedia

The engine is uniflow scavenged with four poppet exhaust valves in the cylinder head. For maintenance, a power assembly, consisting of a cylinder head, cylinder liner, piston, piston carrier, and piston rod can be individually and relatively easily and quickly replaced.

EMD 710 - Wikipedia

The blowers and camshafts are at the "rear" end of the engine, with the blowers mounted above the power take off. All engines have mechanically-controlled unit injectors (patented in 1934 by General Motors, EMD's former owner). All 567 engines utilize forced induction, with either a Roots blower or a turbocharger.
