The barcode has a long and interesting history from its initial development nearly 70 years ago through today. It is an ever changing story, as the technology behind the barcode is constantly evolving, and we discover ways to put more and more information into these “machine-readable” codes. It all started in 1949 on a beach when Joseph Woodland, a mechanical engineer at Drexel University ...

Barcode: The Ultimate Guide to Barcodes

A two-dimensional symbology (2D barcode) such as the PDF417 or Data Matrix barcode should be used to encode this type of data. 2D barcodes encode this type of data when the encoding mode is set to BASE256 or BINARY, which encodes all data, byte-by-byte. When scanning the data, the barcode scanner must be able to read all 256 bits of each byte. This usually means using the serial interface ...
