JQuery UI Cookbook by Adam Boduch (2013, Trade Paperback ...

The jQuery UI autocomplete widget can transform the way each individual item is rendered. By default, it only renders the data label. But that's easy to change by extending the autocomplete widget, and overriding the `_renderItem()` method. For example, if each object in the autocomplete source has some specific field you would like rendered in the autocomplete drop-down, that's not difficult to ...
