Microsoft Solutions Framework (MSF) is a set of principles, models, disciplines, concepts, and guidelines for delivering information technology services from Microsoft.MSF is not limited to developing applications only; it is also applicable to other IT projects like deployment, networking or infrastructure projects.

Microsoft Solutions Framework - Wikipedia

The Agile process supports the following work item types (WITs) to plan and track work, tests, feedback, and code review. With different WITs you can track different types of work—such as features, user stories, and tasks. These artifacts are created when you create a project using the Agile process.
