Smart Meters in Texas
In Texas, the most common way you'll pay for a prepaid or a postpaid (contract-based) electric plan is with a smart meter. Today's smart meters are capable of broadcasting your energy consumption data directly to your electricity provider using radio waves.

balance, like we do in our mobile phones. In this project we are building a automated system by using Arduino and GSM module. You can recharge the electricity balance through this system, just by sending a SMS. It can also disconnect the home power supply connection, if there is low or zero balance in the system.

Energy Meter

The simplest type of prepaid energy meter consists of 2 EEPROMs interfaced to a

microcontroller. One EEPROM contains the recharged balance amount. The microcontroller reads this balance and stores it in the other EEPROM along with the tariff.

The energy meter supplies pulses to the microcontroller for every unit of energy consumed.
