Alan Ball Local History Awards - Wikipedia

The earliest known infrastructure for transport in Somerset is a series of wooden trackways laid across the Somerset Levels, an area of low-lying marshy ground. To the west of this district lies the Bristol Channel, while the other boundaries of the county of Somerset are along chains of hills that were once exploited for their mineral deposits. These natural features have all influenced the evolution of the transport network. Roads and railways either followed the hills, or needed

Transport in Somerset - Wikipedia

The first building had been completed by 1242 as it is described in a letter to Jocelin of Wells. In 1283 John de Botetourt, 1st Baron Botetourt, the warden of the Forest of Dean was instructed to deliver ten oaks from the forest to the Prior of Woodspring. The foundation was confirmed by Edward II in 1325.

Out on the damp, low-lying Somerset Levels to the west of Glastonbury is a wetland reserve managed by the Royal Society for the Protection of Birds (RSPB). The ponds and reedbeds at Ham Wall used to be peat workings, which became redundant in the 20th century and were turned into a nature reserve in the 1990s.

It lies close to sea level south of the Polden Hills, forming a large part of the Somerset Levels and Moors, a wetland area between the Mendips and the Blackdown Hills. The Neolithic people exploited the reed swamps for their natural resources and started to construct wooden trackways , including the world's oldest known timber trackway , the Post Track , dating to the 3800s BC.
